

## Fiberstruct Sealing kit

### 1. Introduction

Fiberstruct sealing kit is a transparent, chemical resistant, cold setting vinylester resin system. All grating, which requires cutting during installation or prefabrication, should have the cut surface sealed with this resin system.

### 2. Storage

Store the kit between 10 °C and 20 °C. Do not expose the kit to either sun or rain. Use before expiry date. Do not use if one of the containers shows signs of leakage.

### 3. Caution

Resin and hardener, separately or combined, will cause skin and eye irritation. Avoid contact with skin and eyes. Do not swallow.

In case of skin contact; wash with soap and water.

In case of eye contact; flush eyes with cold water, consult physician.

### 4. Surface treatment

Clean surface from dust.

### 5. Mixing.

Add the hardener (small container) to the resin (large container).

Mix with wooden stick for at least one minute.

Mix temperature between 10 °C and 25 °C.

### 6. Application

Apply immediately after mixing, with brush or roller, on the prepared surface.

Protect against rain.

*Important:*

If your mix has started to cure in the container, discard and start with a new one.

Pot-life of the mix is approx. 30 minutes. (with normal conditions).

### 7. Curing

Curing will take about half an hour (with normal conditions).
